Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kalt (US 3,205,298) in view of Tanaka et al. (US 6,875,282).

Kalt discloses an inter-module communication comprises a plurality of modules (14) being attached and forming an extendable structure with extendable function using a mechanism which includes a plurality of power rods (39, 40, 41, 42) for electrically energizing and aligning the modules.

Kalt substantially disclosed the claimed invention except for the connection between power rods and the modules is a non-electrical contact connection.

Tanaka et al. teach a method of energizing an electronic device using a non-contact method (column 14, lines 9-29).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a non-contact electrical connection into Kalt's device, as taught by Tanaka et al. for prevention of electrical spark.

In the modified modular electronic device, Kalt in view of Tanaka et al. substantially disclosed the claimed invention except for the modules are liquid filled.

It has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitation. *Ex Parte Masham, 2 USPQ2d 1647 (1987)*.
